(<https://www.linkedin.com/learning/paths/become-a-front-end-web-developer>)

• Developed competency with HTML, CSS, JavaScript, and jQuery; Mastered basic version control with Git and GitHub; Applied best practices in responsive design and progressive enhancement

PERSONAL PROJECTS

Hotel reservation web app (<https://jovan-hotel.netlify.app/>)

- A hotel reservation web app built with React. It uses some of the most modern features of React, like hooks & Context API. Data is stored in the Contentful CMS, and the demo is hosted on Netlify.

Custom made WP website and theme (<https://restaurantcache.com/>)

- A WordPress website made from scratch. Used both front-end and back-end technologies, like advanced custom fields, custom contact form, Leaflet maps API, etc.

Mini Premier League web app (<https://pl-app.netlify.app/>)

- The application uses football-data.org API to show you different pieces of information about teams & players from the English Premier League. Built with React.

Other

- The remaining projects can be seen on my GitHub profile.
